- ***Libraries & Frameworks:*** *NumPy, Pandas*

PROJECTS

ClubSpace – College Club Management Platform | https://task1-club-space.vercel.app/

Tech: *React.js, Node.js, Express.js, MongoDB, Tailwind CSS,Mongoose*

A full-stack college club management platform that allows students to explore clubs, register for events, and interact with club activities through a responsive web interface.

- *Developed a full-stack platform to help students discover college clubs, events, and activities through a centralized interface.*
- *Implemented secure user authentication and role-based access using JWT and cookies.*
- *Built RESTful APIs for managing clubs, users, events, and registrations using Node.js, Express.js, and MongoDB.*
- *Deployed the application using Vercel and Render with a responsive UI optimized for desktop and mobile devices.*

BurgerBox – Food Ordering Website | https://burgerbox-git-main-ashutosh607s-projects.vercel.app/

Tech: *React.js, HTML, CSS, JavaScript*

A responsive food ordering web application that allows users to browse food items, add to cart, and place orders through an interactive and animated user interface

- *Developed a responsive food ordering web application using React.js with component-based architecture.*
- *Implemented dynamic cart functionality and state management for real-time order updates.*
- *Designed modern UI with animations and 3D-style components for enhanced user experience.*
- *Optimised layout for mobile and desktop devices using responsive design techniques.*

TurfMatch – Turf Booking & Player Matching Platform | https://turfmatch-git-main-ashutosh607s-projects.vercel.app/

Tech: *HTML, CSS, JavaScript*

A web platform that allows users to book sports turfs, manage slots, and find players to complete their team based on skill level.

- *Designed and developed a responsive turf booking platform enabling users to reserve sports slots online.*
- *Implemented a player-matching interface that allows teams to find additional players based on skill level.*
- *Created a provider mode interface where turf owners can list and manage turf details and booking slots.*
- *Built an interactive UI with dynamic slot selection, team management, and responsive layout.*
